Balance in Treasury March 8, 1855,	6,575 59	
		$65,575 21

The undersigned, Committee on Finance, in conformity with the requirement of the 14th section of the City Ordinance passed January 16, 1854, have examined the within account of William White, City Treasurer, and have also compared accounts with the vouchers in the hands of the City Clerk, and find the same correct, and sustained by proper vouchers, neatly filed. We find that there has been received into the Treasury, within the year ending February 1, 1855, including the balance of cash on hand, March 17, 1854, the sum of sixty-five thousand five hundred seventy-five dollars and twenty-one cents, ($65,575.21.)

There has been paid from the Treasury during the same time, the sum of fifty-eight thousand nine hundred ninety-nine dollars and eighty-two cents, ($58,999.82,) leaving a balance in the Treasury, March 8, 1855, of sixty-five hundred seventy-five dollars and thirty-nine cents, ($6575.39.)

We also find bills amounting to one hundred and thirty-four dollars and eighty cents, ($134.80,) remaining unpaid, which have been ordered to be paid, and so reckoned in the account with expenditures.

ISAAC SPALDING,
F. S. ROGERS,
J. F. ANDREWS,
J. A. BALDWIN,
} Committee on Finance for the City of Nashua.

Nashua, March 8, 1855.

REPORT

OF THE

CHIEF ENGINEER

OF THE

FIRE DEPARTMENT.

The undersigned, Chief Engineer of the Fire Department, in making his annual report, is happy to be able to rejoice with the citizens, that they have escaped so remarkably any serious losses by fire, during the year. In no year for the last five, has the loss been so small, or the department been called upon to perform duty so few times.

Much of this saving may be attributed to the fact that a thorough search and examination has been made into the location and situation of stoves and stove-pipes; and this is a duty which should not be neglected.

Since Feb. 26, 1854, there have been six fires, and seven alarms, and we would here remark that false alarms are becoming too frequent, either from a love of mischief, or from want of care. No person should give an alarm until he is satisfied there is a sufficient cause. The amount of damage and loss of property by the six fires the past year, did not exceed twenty-five hundred dollars, the principal part of which was covered by insurance.

The Department, at the present time, is in good condition; the companies mostly full, and the machines and apparatus in readiness to do efficient service when called upon. Some of the Hose is becoming old and defective, and should be replaced by new. A few hundred feet additional may be necessary. A petition was, early in the season, laid before the Mayor and Aldermen from members of Lafayette Engine Co., No. 3, for a new engine. The petitioners had leave to withdraw, for the reason that greatly increased facilities for extinguishing fires have been offered the city by the Pennichuck Water Works, thereby doing away with the necessity for additional engines — particularly engines for suction.

There is now on hand and owned by the city, the old No. 1 Engine, which in connection with the hydrants of the Water Co., is capable of doing very efficient service, and in case additional machines should be required, we would recommend that it be put in working order, the expense of which will be small.

During the past year, ample facilities for water have been furnished the city by the Pennichuck Water Works, that company having placed hydrants for the purpose, at convenient points, which are capable of supplying water in abundance to a large part of the city. Should the city avail itself of the privilege by contracting with said Company, we would recommend the formation of three Hydrant Companies, to consist of six men each, whose duty it shall be to inform themselves in the use of the hydrants, and who shall have the management of them, under the direction of the Engineers, at all fires.

Following are the names of the Assistant Engineers, together with the names of the officers and members of the several companies. For a statement of the amount of property in charge of the Department, reference may be made to the schedule of public property submitted by the City Council.

A new and substantial house has been built the last year for Protector Co., No. 4, situated on Lowell street. The house was not completely finished before the commencement of cold weather. A small outlay will now complete the house and lot on which it stands.

JOSEPHUS BALDWIN, Chief Engineer.
